

As pioneers in data science, we use artificial intelligence strategies to gain efficiency and effectiveness in corporate applications and systems that identify, analyze, refine, and generate data to for data-driven decision support.

“Avar has structured its project teams to have the capacity to anticipate requests and take action to address them quickly and efficiently through team decision analysis.”

“Avar has been a good steward of valuable Trust Fund dollars, managing its finances well and looking for efficiencies. This represents a savings to the government and demonstrates that Avar is able to conduct its work efficiently.”

“AMDEX has provided exceptional quality in all areas that they support in Project Management that are outlined in the PWS.”

“AMDEX has provided extremely qualified resources who provided exceptional value to the ITAC organization...the resources have been extremely proactive in coming up with new processes to implement, new ways to track schedule, and new ways to manage ITAC programs.”
